To Whom It May Concern:

As a rural Montana small business owner, I support your efforts to seek continued funding for the Montana Food and Agricultural Development Network.

Our business benefited from the technical assistance and capital resources provided by the Center at Beartooth RC&D. The Center's support provided us the opportunity to develop a marketing plan and an educational website for our rangeland integrated weed control business. This website allows us to serve Montana agricultural producers and Montana small landowners.

It is important to recognize that this network serves a vital role in the development of small agricultural businesses in our rural Montana communities. Please support the Ag. Center Network's funding request.

Thank you,
